8

Deployment Strategy in Enterprise CI/CD

We don't deploy manually — we update Git, and the system makes reality match it.

11

ChatOps in CI/CD

- Slack bots integrated with GitHub
- PR approvals and merge automation
- Trigger deployments directly from chat

REC

12

Infrastructure as Code & Automation

■ Terraform:

- Provision infra (VMs, network, storage)
- Multi-cloud setup

■ Ansible:

- Configuration management
- OS patching & upgrades
- Application setup

13

High Availability vs Cost Optimization

■ Always-On DR

- Dedicated DR environment
- Higher cost
- Immediate failover

10/04/26 13

High Availability vs Cost Optimization

- **Always-On DR**
 - Dedicated DR environment
 - Higher cost
 - Immediate failover

Enterprise CI/CD:
Automation, Governance, and Scale in Modern Cloud Platforms

REC

13

High Availability vs Cost Optimization

■ Always-On DR

- Dedicated DR environment
- Higher cost
- Immediate failover

■ On-Demand DR

- No always-running DR
- Provision using Terraform/IaC
- Built quickly when needed
- Cost optimized

Future of CI/CD - AI

- How AI is Transforming CI/CD
 - Predict deployment failures before they happen
 - Intelligent test selection (run only relevant tests)
 - Auto-detect anomalies in logs and metrics

Closing Thoughts

21

- Start with Git + Linux
- Learn Docker → Kubernetes → CI/CD
- Build real projects (don't just watch tutorials)
- Automate everything you can
- Think in terms of systems, not just code
- Start small
- Build one pipeline
- Automate one project
- keep improving and scaling
